

How Many Servings Will I Get?

One of the most common questions I get from customers is how many servings they can get out of a package or case of Mega Pop Popcorn Kits. There are many factors that can play into your outcome. First, what size package are you using? Second, what are you serving your popcorn in? Third, how much are you filling your bags? We have sat down and done our own measurements based on the Paper Popcorn Bags that we offer.

Below I will show a break down per package and case. We will be using an 8 inch Paper Popcorn Bag that holds **1 ounce** of popcorn. We filled the bags to the top with popcorn, not overflowing.

Mega Pop Popcorn Kit for 8 ounce Poppers

12-16 servings per package - Roughly 384 servings per case
